

# Ahmed Emara

## Mobile Developer (Flutter)

Cairo, Egypt

+201069897625 | emara8028@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

### PROFESSIONAL SUMMARY

Flutter Developer with 3+ years of experience building and delivering 20+ production mobile applications across e-commerce, marketplace, service, fitness, and other domains. Experienced in clean architecture, real-time features, payment gateway integration, Google Maps, RESTful APIs, push notifications, background location, application deployment, and reusable Flutter packages published on pub.dev. Strong collaborator with clients, UI/UX designers, product teams, and backend developers, focused on maintainable code, performance, and reliable user experiences.

### EDUCATION

Bachelor of Computer & Information - Mansoura University

Oct 2021 - Jul 2025

### PROFESSIONAL EXPERIENCE

#### AWAMER ALSHABAKA (AAIT)

Jul 2024 - Present

- Developed and maintained 20+ production Flutter applications across e-commerce, marketplace, service, fitness, and other domains for users in Saudi Arabia.
- Built real-time single-app and multi-app solutions using Clean Architecture, Bloc/Cubit, RESTful APIs, and scalable reusable Flutter components.
- Integrated payment gateways, Google Maps, live and background location, push notifications with FCM/APNs, deep linking, and other mobile services.
- Collaborated with backend, product, and design teams to define APIs, data flows, user journeys, and implementation details.
- Designed and published 3 reusable Flutter packages on pub.dev, reducing duplicated implementation for pagination, timers, and searchable dropdowns.
- Supported release and deployment workflows through App Store Connect, Google Play Console, and CI/CD pipelines using Codemagic.

#### Freelance Flutter Developer

Jun 2023 - Jun 2024

- Managed end-to-end Flutter project delivery for clients, from requirements gathering and analysis through implementation and release preparation.
- Worked directly with clients to clarify business needs, convert requests into technical requirements, and prioritize application features.
- Coordinated with backend developers and UI/UX designers to align APIs, user flows, designs, and implementation details before delivery.
- Built responsive cross-platform Flutter applications with reusable code and maintained clear communication throughout the delivery cycle.

### TECHNICAL SKILLS

**Programming & Framework:** Dart, Flutter SDK, OOP, SOLID Principles

**Architecture & Patterns:** Clean Architecture, MVVM, MVI, Design Patterns, modular and reusable code

**State Management:** Bloc, Cubit, Provider, MobX

**Networking & APIs:** RESTful API Integration, Dio, Retrofit, JSON handling, Error Handling

**Firebase & Messaging:** Firebase Services, Firebase Cloud Messaging (FCM), Push Notifications, APNs, Firebase Remote Config, Crashlytics, Analytics, Local Notifications

**Real-Time & Background:** WebSockets/Socket.IO, live location and tracking, Background Location, Background Services

**Data & Persistence:** SQL, NoSQL, SharedPreferences, Hive, SQLite

**Mobile Integrations:** Google Maps, Payment Gateways, Deep Linking, Localization

**Testing & Quality:** Unit Testing, Widget Testing, Integration Testing, debugging, performance optimization, maintainable code

**Deployment & DevOps:** App Store Connect, Google Play Console, App Deployment, CI/CD Pipelines (Codemagic), Git, GitHub, GitLab

**Package Development:** Reusable Flutter packages, pub.dev publishing, reusable component design

**AI Tools:** AI-assisted development, MCP servers

### SOFT SKILLS

**Problem Solving & Ownership:** Analytical thinking, requirement understanding, attention to detail

**Collaboration & Communication:** Client communication, team collaboration, backend and design coordination, clear technical communication

**Delivery & Time Management:** Prioritization, task planning, deadline awareness, adaptability

**Learning & Improvement:** Continuous learning, feedback-driven improvement, willingness to adopt new tools

## OPEN-SOURCE FLUTTER PACKAGES

---

### Pagify

Apr 2025

Reusable Flutter pagination widget for ListView/GridView data, preserving scroll position during loading and supporting Dio, HTTP, and network-interceptor error handling. [pub.dev](#)

### Easy Timer Count

Feb 2025

Flexible countdown/count-up timer widget with customizable styling and control capabilities for Flutter applications. [pub.dev](#)

### Dropinity

May 2025

Searchable and paginated Flutter dropdown for local or remote data with multi-selection support, built to work with the Pagify package. [pub.dev](#)

## PROJECTS

---

### Sitr (ستر)

Oct 2025 - Dec 2025

Online engagement system for individual users and parents, supporting legal marriage according to Islamic principles.

Links: [Google Play](#) | [App Store](#)

### 2 Days

Feb 2026

Marketplace and rental platform connecting buyers, sellers, landlords, and renters across Saudi Arabia. Uses maps to calculate distances between users and supports payment services and electronic agreements for buying, selling, renting, and leasing goods, vehicles, equipment, tools, services, and more.

Links: [Google Play](#) | [App Store](#)

### O Car

Mar 2026

Car marketplace for buying and selling new and used vehicles, enabling users to browse thousands of listings and find the best available deals.

Links: [Google Play](#) | [App Store](#)

### D-Bikes

May 2025 - Jul 2025

A specialized platform for buying and selling new and used motorcycles, bicycles, jet skis, boats, yachts, and related spare parts and accessories.

Links: [Google Play](#) | [App Store](#)

### FIX

Jan 2026

Two connected mobile applications for repair service management. Clients can request services, negotiate prices, chat in real time, and track the provider's live location and arrival status; providers receive requests, communicate with clients, and update job progress.
